A GOOD COMBINE LOOKS ITS BEST ON THE DEALER LOT.

A GREAT COMBINE LOOKS IT'S BEST IN THE MUD.

Gleaner is a performance combine. It's made for tough crops, tough fields and long days. It's lightweight well balanced and has one monster of a power plant pushing it through any condition. It's also built for field serviceability like no other combine because time out of the field is money out of your wallet. If you're ready to trade in your good combine for a great combine, come take a look at our A7 Series. If you call us before you come, we might even be able to throw a little mud on it.

Find out more about making Gleaner part of your success by contacting your local dealer or visiting us online at www.agcoiron.com.

Practising for the show

Five-year-old Jamie Draper of Durham was quite willing to show off his 2-month- old Limousin X Angus calf named Buttercup. He was spending some time practising for the showmanship class at the Hanover Fair. This is his second year showing a calf. PHOTO BY

Golden Horseshoe, Holland Marsh food strategy being created

BY ANNE HOWDEN THOMPSON

Ontario Farmer

The creation of a new food and farming strategy in the Toronto area aims to create a 10 year plan for farmers

in that area.

The Greater Toronto Area Agriculture Action Committee (GTAAAC), together with the City of Hamilton, Niagara Region and the Holland

Marsh Growers' Association recently funding to create a 'Food and Farming Strategy and Action Plan for Ontario's Golden Horseshoe and the Holland Marsh'. Support for this project has been provided by Agriculture and Agri-Food Canada through the Canadian Agricultural Adaptation Program (CAAP). In Ontario, the Agricultural Adaptation Council delivers this program.

The need for such a food and farming strategy for the highly urbanized areas within the Golden Horseshoe and Ontario's Greenbelt was envisioned at a July 2009 meeting of all of the groups supporting this initiative, says Peter Lambrick, Halton Region farmer and chair of the GTAAAC Food & Farming Strategy and Action Plan Committee.

"We farm in spaces within the greatest urban concentration anywhere in Canada, and the GTA is home to the second-largest food processing economy in North America. We need a practical action plan that ensures co-existence of agriculture, food processing and urbanization for mutual benefit, as well as sustainability of the environment, human health and the economy."

The anticipated outcome of this project is not just another consulting report, but a 10-year plan that will serve as a blueprint for progress.
